RONEN FOUNDATION of AMERICA was founded in memory and legacy of RONEN ISRAELI (1968-1992).

The foundation extends a warm and caring hand to support skilled young artist in the field of classical music in the beginning of their musical path. The study of music, especially the field of performance is a long process. It requires musical skills special characteristics, soul and money. Most of the young promising artists have to deal with tough financing issue. Their progress and development as musicians and as artists is almost impossible without outside support.

The Israeli sister Foundation has already helped many Israeli musicians in achieving their goals. With the establishment of "Ronen Foundation of America", we wish to continue the chain of magical creation. This can only be done through invaluable enhancement of young talented artists in the field of classical music.

The foundation with great satisfaction and pride, follows the careers of some of its internationally renowned graduates.

The contribution of these young talents - the future generation – is a blessing and vital for the enrichment of our world.

Ronen's memory is kept alive in our hearts through the beauty and inspiration of classical music.

We wish to continue the chain of magical creation and with much appreciation, see you join our cause.

The foundation is blessed with a group of friends and dedicated volunteers that cherishes Ronen's memory by carrying out its operations and mission.

THANK YOU FOR BEING A PART
OF THE DREAM
